An important note to Association administrators

- If you request your Clubs to create their own products and add their products to the Member to Club National Registration form, please be aware, if you are editing the same form at Association level, you will not see the Club product selections as ticked checkboxes.
- However, if you drill down to Club level and edit the National Registration form you will see all selected Club products marked as a ticked check box.
- Our recommendation to you is its important you do sufficient testing of your forms prior to their public release.

An Association Administrator also has the option to add Club created products to the Member to Club National Registration form at Association level once the Club has created their products.

You can do this by logging in at Association level and following these simple steps:

1. Hover over the *Registrations* tab and click **Products**.

2. Click Add New Product.

3. Fill in all compulsory details and click Update.
